PROFILE

A goal-oriented front-end developer with knowledge of HTML, CSS, JavaScript and React. Seeking to use technical proficiency, strong problem-solving skills and creativity to develop exceptional user experiences. As well as to leverage effective debugging, code optimisation and project collaboration capabilities. And advance in a professional career.

SKILLS

- **HTML**
- **CSS**
- **Bootstrap**
- **TailwindCSS**
- **JavaScript**
- **React.js**
- **Redux**
- **Git**
- **GitHub**
- **Next.js**

PROJECTS

UkExpress

UkExpress is an e-commerce web app. Build on front-end development with Vite. The products are fetched and cached with Redux Toolkit Query from dummyjson.com API. Authentication is implemented via Supabase API. The project aims to showcase my ability to create a complex web app with global state management using back-end API, code splitting and optimisation.

- Technologies: Vite, TypeScript, Redux Toolkit, React Hook Form, TailwindCSS
- Accomplishment: Learn to code with TypeScript, better structure the file system, handle global state management and implement authentication with the help of a back-end API.

DevGuide

DevGuide is a web app containing information for educational events for development. It features a navigation bar with links to front end, back end and full stack events. The project aims to showcase my knowledge and ability to use client-side and server-side rendering using NEXT.JS. As a data storage, I used the Firebase.

- Used Technologies: NEXT.JS, Firebase, vanilla CSS.
- Accomplishment: A better understanding of client-side and server-side rendering.

GeoQuiz

GeoQuiz is a project for Learning People. The project aims to showcase my knowledge and ability to build a JavaScript interactive website. Features navigation, about, how to play and the quiz sections. The quiz section contains questions, time and score trackers and has sounds for correct and incorrect answers. After the completion of the quiz, a summary report is displayed.

- Used Technologies: HTML, CSS, Bootstrap, vanilla JavaScript.
- Accomplishment: Introduction to fundamentals of vanilla JavaScript.

Sneakers

Sneakers is a project for Learning People. It's an e-commerce web app. The project aims to showcase my knowledge and ability to build a React app. The web app features navigation with links, cart and user image, lightbox gallery, buttons for the number of pairs, add to cart button and a checkout modal with a delete option.

- Used Technologies: React.JS, vanilla CSS, Redux, MUI.
- Accomplishment: Introduction to fundamentals of React and npm manager.

EDUCATION

Certificates
